PARISIAN ARCH

This swinging sign hanger projects the sign panel above and out from the mounting point, which is a great benefit in situations where the fixing point may be limited to a low fascia or adjoining brick work.

- Each sign hanger comes fully zinc plated and powder coated giving a durable gloss black finish.
- The sign panels are moulded from high quality UV stable rigid plastic, and will directly accept vinyl and most paints.
- All fixing supplied are stainless steel and all mounting holes are pre-drilled at 8.5mm diameter.
- Mounting plate requires a relatively small fixing area.

O/A DIMENSIONS	DISPLAY AREA	WEIGHT
815 x 630mm*	340 x 555mm	8kg

FIXINGS INCLUDED.
* NON-STOCK. CONTACT US FOR AVAILABILITY.

FLORAL CLASSIC

Suitable for both interior and exterior use, the Floral Classic comes in a standard black finish, with a fixed sign panel firmly mounted onto three points. The sign can also support a hanging basket, which can add a whole new dimension to displaying a sign. Includes Bracket, panel and fixings.

- Zinc plated and powder coated giving a durable, corrosion resistant gloss black finish.
- Panels are moulded from high quality UV stable rigid plastic, and will directly accept vinyl and most paints.
- All fixing supplied are stainless steel and all mounting holes are predrilled at 8.5mm diameter.

O/A DIMENSIONS	DISPLAY AREA	WEIGHT
625 x 635mm	340 x 550mm	8kg

FIXINGS INCLUDED.

CURVEX

The sleek and clean design of this projecting sign offers a contemporary look. Featuring a strong box section construction and is zinc plated and powder coated. The curved panels are preformed aluminium and simply bolt on with stainless steel fixings (supplied).

- Supplied as a complete unit and powder coated silver as standard which can easily be over-painted if other colours are required.
- Vinyl can be directly applied to the panels.
- Can be wall or ceiling mounted.
- Available in both portrait and landscape versions.

POSTER DISPLAY & BROCHURE HOLDERS

Snapframes

An advertising staple for all businesses, the front opening poster frames allow for quick and easy change of graphics.

WHY SIGN MAKERS LOVE THIS PRODUCT

· Features an anodised finish as standard.
· When closed, all fixings and opening methods are hidden from view.
· Comes with anti-glare poster cover sheets.
· Pre-drilled and individually boxed with screws and wall plugs.
· Suitable for indoor or outdoor use.

POSTER SIZE	DISPLAY AREA	PROFILE
A5	128 x 190mm	15mm
A4*	192 x 279mm	25mm
A3*	279 x 402mm	25mm

POSTER SIZE	DISPLAY AREA	PROFILE
A2	402 x 576mm	25mm
A1	576 x 823mm	25mm
A0	810 x 1157mm	38mm

Note

Suitable for outdoor use but poster cover sheets are not fixed, and in high winds can become dislodged, so we recommend wider frame profile Snapframes which provide better poster security.

Please ensure your posters are laminated with waterproof material if displaying your snapframe outside. No Snapframe is completely waterproof, and so may suffer from condensation. Posters will get damp outdoors, so your choice of poster material is important.

* NON-STOCK. CONTACT US FOR AVAILABILITY.

Images for illustration purposes only.

sd+ ## SECURITY SNAPFRAMES

SD+ Security Snapframes provide that additional poster security as they are virtually impossible to open by hand, yet easily opened with a hand-held opening tool (sold separately).

WHY SIGN MAKERS LOVE THIS PRODUCT

- Ideal for those spaces at risk of unwanted tampering (schools, venues, reception areas etc).
- Supplied with anti-glare poster cover sheets for clear poster display.
- Pre-drilled and individually boxed with screws and wall plugs.
- Suitable for either indoor or outdoor use.

GOOD BYE ROLL UP!

HELLO **PIXLIP**POP

PIXLIP POP is the first **mobile backlit** alternative to the classic roll-up and conventional banner display. The efficient **integrated LED backlighting** grabs the attention making it ideal for POS across exhibitions, events and much more.

PIXLIPPOP

Pixlip POP guarantees **maximum** attention thanks to the integrated backlighting system. When compared to conventional roll-ups, sales of the Pixlip Pop have shown to increase exponentially thanks to the ease of graphic change, illumination effect, simple assembly and lightweight construction which makes it easy to transport.

PIXLIP POP LASTS
The average life expectancy of a PIXLIP POP illuminated frame is 10 years, and you can keep providing your customer with replacement prints throughout this time.

CONSTRUCTION
Thanks to the simple plug-in system and the lightweight construction made of particularly thin aluminium, all components can be assembled without tools. Disassembled into individual parts PIXLIP POP weights only 5kg, making it **easy to store and transport**.

LED ILLUMINATED
PIXLIP POP backlighting is not provided by LED modules installed on the side, but by narrow LED strips which enables a particularly narrow frame depth of only 75mm! When rolled up, the flexible LED panel can be packed into a practical carrying bag to save space.

INDIVIDUALITY
The individually designed textile prints make every PIXLIP POP advertising banner a unique eye-catcher. Unlike roll-up banners, the printed textile can be exchanged, reused or replaced at any time.

ZIP CLIP Steel Cable

Zip-Clip Steel Cable gives the ability to produce your own made to measure wire suspension systems when used in conjunction with Zip-Clip Rizes. Simply use a zip-clip to attach the wire to your chosen anchor point. The cable comes pre-reeled in a handy box - simply cut to the length you require, saving on wastage. Easily transportable, the cables are rated for a safe working load of up to 50kgs.

Ideal for:
- Wrapping around existing steelwork, I-beams or purlins.
- Suitable for use with a wide range of fixings including eye bolt adapters, concrete fixings, deck wedges, purlin clips.
- Ideal for secondary light supports.

CABLE	DIAMETER	LENGTH	LOAD	COMPATIBLE RIZE

GHOST

KD Ghost is a perfect choice when space's are to be hidden and holes in the panels are not possible or wanted. The combination of polycarbonate fastener and metal wall spacers give a floating look, with no restrictions on sign thickness.
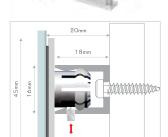

To use, simply:
• Remove the protection foil and press the fastners to the panel.
• Mark the exact position for wall holes where wall spacers will be fixed to.
• Wallmount the metal wall spacers.
• Click in your panel!

Safety notice: Every application must be tested if suitable for the materials and weight to be installed. When using adhesives, follow manual instructions carefully.

PIXFIX

Pixfix will inspire you to be more creative when hanging signs as it allows you to secure signage to a wall invisibly without the need to drill holes in the signage itself. Thanks to the clever insert system, you can simply exchange the panels at anytime. Pixfix is suitable for all materials and can be mounted with screws, adhesive or silicones. The Pixfix can be your perfect solution for mounting photos, wall direction sign systems, POS graphics or any sign that you really want to look high quality with no holes or fixings showing.

To use, simply:
1. Remove the adhesive tape foil.
2. Mount Pixfix to the panel.
3. Mount the Wall Support to the wall.
4. Click in your panel!

Safety notice: Every application must be tested if suitable for the materials and weight to be installed. When using adhesives, follow manual instructions carefully.

sd+
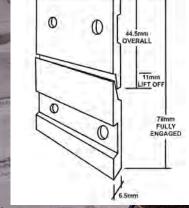

sd+ Panel Clip

Panelclip is an extruded aluminium heat treated profile for the secure installation of architecture panelling, signs and artwork. Panelclips have a 100% positive-stop interlock, providing the strongest, simplest solutions for signage installations. Panelclip can reduce installation time and costs too as panels can be prefinished, which means no face nailing or on the job finishing. Panelclip also allows for easy panel removal for remodelling or refinishing.

MATERIAL	LENGTH
Aluminium	1000mm

PANELCLIP1MTR

PanelClips are not pre-drilled. PanelClips must be cut to accommodate top an bottom installation requirements.

POLYTOP SCREWS

Polytop screws are a simple zinc plated one-piece fixing with an innovative, encapsulated polymer head. They offer a stable fixing for use on exposed fixing areas. The polymer used is corrosion resistant, so are ideal for both indoor and outdoor use. The colour co-ordinated head will not separate as with other two-part screw and cover fasteners.

COLOURS	SIZE	PACK
Red, Green, Blue, Yellow, Black, White, Brown	24mm/10 Gauge	Pack of 100

POLYSCREWS

POLYTOP RIVETS

Polytop rivets are encapsulated, using a high precision polymer profile, injection moulded onto an aluminium, blind open rivet. The tough colour co-ordinated head will not separate or deteriorate over time as with other fixings. You can now avoid the unsightly peeling associated with painted rivets or the problems with lost caps and covers that occur with two part fixings.

COLOURS	SIZE	PACK
Red, Green, Blue, Black, White	4.8mm x 12mm	Pack of 100

FIXTURES FOR FREESTANDING SIGNS

Quickbase

This new panel base features a clamping profile for securing information and advertising boards. Ideal for interior or exterior use. Quickbase is the perfect choice for anybody who is looking for a flat, light base.

WHY SIGN MAKERS LOVE THIS PRODUCT

- Easy mounting of all types of rigid displays.
- Lightweight stable display.
- Tipping protection thanks to the extremely flat base.
- Robust and long expectancy life thanks to its powder coated surface.
- Use multiple Quickbases together to create larger displays.
- Can accomodate different types of materials such as Diabond, Plexiglass, metal or other synthetic materials.
- Thanks to the slim appearance of Quickbase your print will not be obscured.

VEHICLE WINDOW CLIP

The SD+ Vehicle Window Clip is designed to easily slide onto most car or truck windows. Car dealer's love this high-impact tool because they're inexpensive, especially when comparing the cost to a plastic tent or canopy. The Window Clips are lightweight and durable, and made to use over and over again. To assemble, you simply insert the prongs into the core of a pre-printed corrugated plastic sign.

HEIGHT	WIDTH	PANEL SIZE (H X W)
584mm*	273mm	460 x 605mm

* NON-STOCK. CONTACT US FOR AVAILABILITY.

HOT-DOG DISPLAY STAND

The SD+ Hot-dog display stand is designed for indoor table and counter-top use. It's an extremely low-cost, compact design that supports the much smaller versions of corrugated plastic and cardboard signage. The unit accepts 4mm corrugated plastic and is perfect for displaying counter top courtesy signage. Simple, effective, and great value for a low cost.

ROAD SIGN FIXING SYSTEMS

Anti-Rotational Steel

ANTI-ROTATIONAL STEEL FIXING CLIPS

The SD+ Anti-Rotational Clips are a fast and simple solution for mounting signs to circular poles. These stainless steel clips are available in a range of sizes and are supplied complete with M8 fixing bolts, washers and nuts. The Anti-Rotation is achieved with raised pips on the inside of the clip which prevents the rotation of the sign when it's mounted on a single post.

BANDING SYSTEM

The SD+ Banding System provides a fast and versatile solution for fixing signs to large and varying diameter posts. The Banding Tool is perfect for securely installing large numbers of signs without the hassle of nuts, bolts and washers. The Banding comes on a reel and when used with the buckles, this system ensures both speed and security when fixing panels to posts.

ITEM	SIZE
Buckles	19mm

ITEM	SIZE
Banding Reel	19mm x 30.48mtr

UNIVERSAL CHANNEL CLAMP

This highly versatile fixing will operate with a band up to 19mm (3/4") wide. As the band is tightened, its tensioned spring design locks it solidly in place, preventing any sideways movement.

PACK
Pack of 1

TAMTORQUE CLIPS

Tamtorque Clips have been designed for clamping signs of all types to round, square, hexagonal or any unusual shaped post, giving a quick and reliable fix every time.

They are available in a range of diameters eliminating the need to cut the band to size. They do not therefore have sharp edges which can snag or cut and, unlike other banding systems, can be easily reused or readjusted.

Tamtorque Clips feature a hardened tamper resistant screw with a unique recessed seven sided socket. This means that they can only be tightened or released with a special Tamtorque screw bit.

An auto locking safety buckle ensures the free end of the band is both safe and tidy.

Hiker Grommeting Hand Press

The Hiker hand press Grommeting Machine offers all the versatility you'll ever need from a hand press. The die is interchangeable, so you can insert several types and sizes of grommets with the same press. The lower die is adjustable, which provides a consistent, quality setting in various material thicknesses. Designed to produce up to six times more cutting and closing pressure than other competing presses, it's ideal for flat washers, turn-over washers, spur washers, thin material, thick material, whatever your needs are, it's the best hand press available.

Images for illustration purposes only.

ALL THE VERSATILITY YOU'LL EVER NEED FROM A HAND PRESS

HIKER GROMMETS

The Hiker self-piercing grommets come in a packs of 500 and are available in three sizes, with the larger being available in both nickel or brass plated finishes.

SIZE	INT. DIA.	EXT. DIA.	FINISH

sd+

THE SD+ VST RANGE OF HIGH PERFORMANCE STRUCTURAL BONDING TAPES ARE OF THE HIGHEST QUALITY AND PERFORMANCE LEVELS OF ANY DOUBLE-SIDED BONDING AND MOUNTING TAPES ON THE MARKET. THESE HIGHLY VERSATILE TAPES CAN BE USED FOR A WIDE RANGE OF APPLICATIONS ACROSS SEVERAL INDUSTRIAL SECTORS.

The acrylic foam tapes are available in grey, clear, and white in thicknesses from 0.25mm to 3mm with fine tolerances in densities from 650kg/m³ to 1500kg/m³. Acrylic foam tapes have excellent load bearing performance with market leading cohesive strength, dynamic shear and tensile adhesion.

The tapes will bond a wide variety of materials and are especially good at bonding metals, plastics and glass.

The acrylic foam tapes have outstanding all weather performance and can withstand temperatures of -40°C to +160°C over the short term.

These tapes also have very good resistance to humidity and act as a moisture barrier when applied.

Acrylic foam tapes are visco-elastic and when applied will compensate for termal expansion and contraction of different substrates at high and low temperatures, unlike other double-sided tapes.

Tapes are UV cured and contain no solvents, are good for the environment and have low outgassing. So for an extensive quality driven and reliable range of tapes for use in permanent and temporary fixing, for internal and external applications - simply choose SD+ VST Tapes.

THE FOAM TAPE EVERY SIGNMAKER NEEDS.

GREY VST6110G FOAM TAPE
A HI-BOND ACRYLIC FOAM TAPE
FOR THE SIGNAGE INDUSTRY.

The sign and display industry uses adhesive tapes extensively to provide fast, clean and easy bonding, fixing and mounting solutions. Grey VST6110G is an essential foam tape for every sign shop as it offers a high performance over a number of applications. Ideal for permanent fixing of internal and external applications.

- Ideal for road traffic signage and large panel signs.
- Fix individual letter Signs cut from metal, plastic, foam PVC, sealed wood and many other surfaces.
- Bond panels to framework, metal or plastic sheet to metal frames.
- Achieve excellent results when bonding glass screens or powder painted metal fascias on dot matrix displays.

sd+

APPLICATIONS:

ROAD TRAFFIC SIGNS.
Road traffic signs are manufactured to a high standard, having to withstand wind-shear forces requiring strong reinforcing. This is achieved through bonding metal bars with acrylic foam tape. Using rivets on such signs may result in distortion of the plates and possibly metal fatigue, but by using tape, the face of the sign is uniform and even, ideal for applying reflective graphic films.

LARGE PANEL SIGNS.
Large panel signs, similar to road traffic signs, are reinforced with Hat channels or U Channels. These are external signs required to withstand extreme climatic conditions and wind-shear.

FIXING INDIVIDUAL LETTER SIGNS, CUT FROM METAL, PLASTIC AND OTHER MATERIALS.
Depending on the size and uniformity of the surfaces to be bonded this will determine the thickness of the tape used for the application. The tape should be applied in the vertical for fixing the letters.
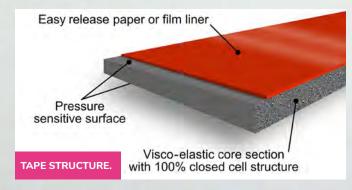

FIXING SIGN FRAMES.
Almost exclusively, external signs are typically fabricated with painted metal. The application requires the bonding of sheet metal to frames. Acrylic foam tapes prevent warping and distortion of the sheet metal due to expansion of the metal at high temperatures. The tape is also resistant to extreme weather conditions.

FRAME AND FASCIA BONDING FOR DIGITAL SIGNS, FOR DOT MATRIX OR LED DISPLAYS.
Grey VST6110G is ideal for bonding the frames and housings to the screens. Glass screens or powder painted metal fascias on dot matrix displays can also be bonded for excellent results.

Easy release paper or film liner

THE CLEAR CHOICE FOR BONDING TRANSPARENT GLASS AND PLASTICS.

CLEAR VST4100C FOAM TAPE.
FOR BONDING ALL TYPES OF GLASS AND TRANSPARENT PLASTICS.

Clear VST4100C Foam Tape is a highly visco-elastic and conformable tape, giving an invisible bond line when bonding a variety of coloured materials.

The tapes are solvent free and will not damage or degrade polycarbonate and other plastics when applied. Clear acrylic foam tapes have a wide scope of applications in the sign, display and point of sale industries.

VST4100C

APPLICATIONS

BONDING CLEAR POLYCARBONATE SHEET FOR ILLUMINATED SIGNS.

IDEAL FOR BONDING GLASS.

FIXING LED LIGHT STRIPS.

The clear acrylic tapes are ideal for bonding glass and transparent plastics. Used for fascias on back lit signs, the clear acrylic foam tapes do not discolour or deteriorate when exposed to high levels of UV light. VST4100C Foam Tape also acts as a complete moisture and humidity seal to prevent condensation forming within the box sign.

Used for backsplashes or glass door signs, VST4100C tape is ideal for applications requiring an invisible bond line. VST4100C is soft, tacky and conformable. It won't discolour or deteriorate when exposed to high levels of UV light. Ideal for applications across glass partitions, windows and doors. This tape also acts as a complete moisture and humidity seal to prevent condensation forming within light box signs.

LED lights are being used more and more in the sign industry. Strip lights are encapsulated with flexible plastic, allowing for fixing and mounting in a wide variety of applications. VST4100C tape is ideal for fixing LEDS to all types of signs and displays.

Images for illustration purposes only.

THE MOTHER OF ALL BONDING TAPES.

WHITE VST4110W FOAM TAPE.
OUR HIGHEST PERFORMING TAPE.

VST4110W is the mother of all tapes as it bonds extremely well to a wide range of metals, plastics, ceramics and composites.

VST4110W will perform short term at 200°C and long term 150°C. Like most acrylic bonding tapes 4110W has good UV, water and humidity resistance. VST4110W is designed to absorb structural changes in any joined substrates and won't let you down when it comes to any demanding or critical applications. VST4110W also comes with a 20 Year guarantee.

sd+

APPLICATIONS

FIXING INDIVIDUAL LETTER SIGNS, CUT FROM METAL, PLASTIC AND OTHER MATERIALS.
Depending on the size and uniformity of the surfaces to be bonded this will determine the thickness of the tape used for the application. The tape should be applied in the vertical for fixing the letters.

PRODUCTION OF PILLAR SIGNS.
Ideal for bonding panels to framework, metal or plastic sheet to metal frames. Dependent on the size/scale of the sign, using the correct thickness of tape is important. Where larger panels are used it is more likely that there will be a mismatch and a thicker tape will be required. Using tape will give a flush uniform finish to the sign.

ORABOND® 1819

- High adhesive and shear strength.
- Recommended for smooth surfaces.
- Excellent resistance to UV light, solvents and plasticiers.
- Ideal for use on extruding parts such as panels, bars and signs, as well as plexiglass mirrors for interior fit-outs and displays.
- Due to good UV, water and age resistance this product is also suitable for external applications.

ORABOND® 1399TM

HIGH PERFORMANCE DOUBLE COATED TISSUE TAPE FOR ROUGH SURFACES.

- High adhesive and shear strength.
- Excellent resistance to UV light, solvents and plasticiers.
- Long term temperature resistance.

Ideal for POS displays, outdoor signs and banners. Works great with APET sheets and fluted corriboard sheeting, Foamboard, Lexan and Hi-Impact Styrene.

SIZE
25mm x 50m

OF1399TM

ORABOND® 1459 HI-TACK

HIGH TACK RUBBER DOUBLE SIDED TAPE.

- Very high tack and adhesive strength.
- Excellent bonding on paper and board, rough surfaces or foams.

Ideal for paper and board displays, point of sale applications, sample cards, poster fixing and bag seals.

SIZE
25mm x 50m

OF1459

ORABOND® 1375 TRANSFER TAPE

HIGH PERFORMANCE 60 MICRON ACRYLIC TRANSFER TAPE.

- Excellent adhesive and shear strength with high transparency.
- Extreme resistance to UV light, solvents and plasticiser.
- Long term temperature resistance.

Ideal for metal and plastic name plates and fascia panels, front plates and displays that require an extremely high shear strength.

SIZE
305mm x 50m

sd+

sd+ VELCRO

Velcro is a brand name of fabric hook-and-loop fasteners. It consists of two layers: a 'hook' side, which is a piece of fabric covered with tiny hooks, and a 'loop' side, which is covered with even smaller and 'hairier' loops. When the two sides are pressed together, the hooks catch in the loops and hold the pieces together. When the layers are separated, the strips make a characteristic 'ripping' sound. Available in two colour's white and black, in strips or dots.

sd+ POWER TAPE®
BANNER HEMMING TAPE

Reinforce banner edges with this one sided hemming tape without folding or sewing a hem.

- Duplicates the strength of folded hem and double-sided banner tape but eliminates the hassle.
- Create a perfectly sharp digital banner with no rippled hem.

POWER TAPE® TIPS

- Recommended for outdoor banners more than 8 feet in length.
- Apply light tension to banner for easy application. Position 1/8"-1/4" from top and bottom edge to allow for some tape wander.
- PowerTape® may be used along sides of vertical banners to reduce tape curl.

WIDTH/LENGTH
38mm x 33m

3. FOLD OVER HEM

4. SECURE WITH ROLLER

TUFF TAPE BANNER HEMMING TAPE

Images for illustration purposes only.

EASY APPLICATION

VST FOAM TAPES ARE EXTREMELY EASY TO USE AND CAN BE APPLIED WITHOUT ANY SKILL REQUIRED. SIMPLY APPLY WITH A ROLLER USING EVEN PRESSURE ALONG THE TAPE.

For best results, it is important to ensure that surfaces required for bonding are prepared and cleaned, preferably with alcohol isopropyl. Clean the surface with a lint free cloth (powder coated, oxidised surfaces must be clean prior to application).

VST tapes should be applied in temperatures above 10 degrees Celsius, and applied using even pressure along the tape with a roller. The pressure activated bonding tape is not sticky to the touch and must be pressure applied to activate the bond – don't use clamps as they would cause uneven pressure points along the tape.

BONDING TIMES

20 MIN - APPROXIMATELY 50%.
24 HRS - APPROXIMATELY 90%
72 HRS - 100%
To speed up the process you can slightly heat up the surface to which the tapes are being applied (not the tape!).

VST Foam Tapes have a guaranteed life span of 20 years, are non-toxic and are Diesel, Petrol and Detergent splash resistant!

VST Foam Tapes are also designed to withstand the expansion or shrinkage characteristics of different substrates which are exposed to extreme temperatures. For example how metal and glass might react whilst exposed to severe weather conditions. The bond will remain strong.

BERGMEN® OTIE

The Bergmen Otie Controller is driven via a wireless connection between the remote controller and device. Easily make light intensity adjustments (256 adjustments available), with protection from overheating, short circuit and over loading. IP35 Rated.

WIRELESS CONNECTION BETWEEN REMOTE AND DEVICE.

MODEL	VOLTAGE	POWER	OUTPUT CURRENT	CONTROL	DIMENSIONS	WEIGHT
OTIE LED Controller*	5-24 V DC	3 x 15W 5V DC 3 x 36W 12V DC 3 x 72W 24V DC	3 x 3a	RF	87 x 21 x 8.5mm	0.022kg
OTIE LED Dimmer*	5-24 V DC	35W 5V DC 84W 12V DC 168W 24V DC	7a	RF	87 x 21 x 8.5mm	0.022kg

LEDOTIE   * NON-STOCK. CONTACT US FOR AVAILABILITY.

BERGMEN® OTIE BLUETOOTH

The Bergmen Otie Bluetooth Controller allows the user to steer the LED lighting by smartphone via BlueTooth connectivity. Compatible with LED lighting products of between 6-24v. Use from distances of up to 10m.

STEER THE LED LIGHT BY SMARTPHONE VIA BLUETOOTH CONNECTIVITY.

MODEL	VOLTAGE	OUTPUT CURRENT	CONTROL	DIMENSIONS	WEIGHT
LED Bluetooth OTIE Dimmer*	6-24 V DC	9a	Bluetooth V2	87 x 21 x 8.5mm	0.022kg
LED Bluetooth OTIE Controller*	6-24 V DC	3 x 3a	Bluetooth V2	27 x 21 x 8.5mm	0.022kg

LEDOTIE   * NON-STOCK. CONTACT US FOR AVAILABILITY.

BERGMEN® SUPLE RGB AMPLIFIER

The easily installed Bergmen Suple RGB amplifier amplifies the LED RGB/Mono signals, with high output power – even through its compact size.
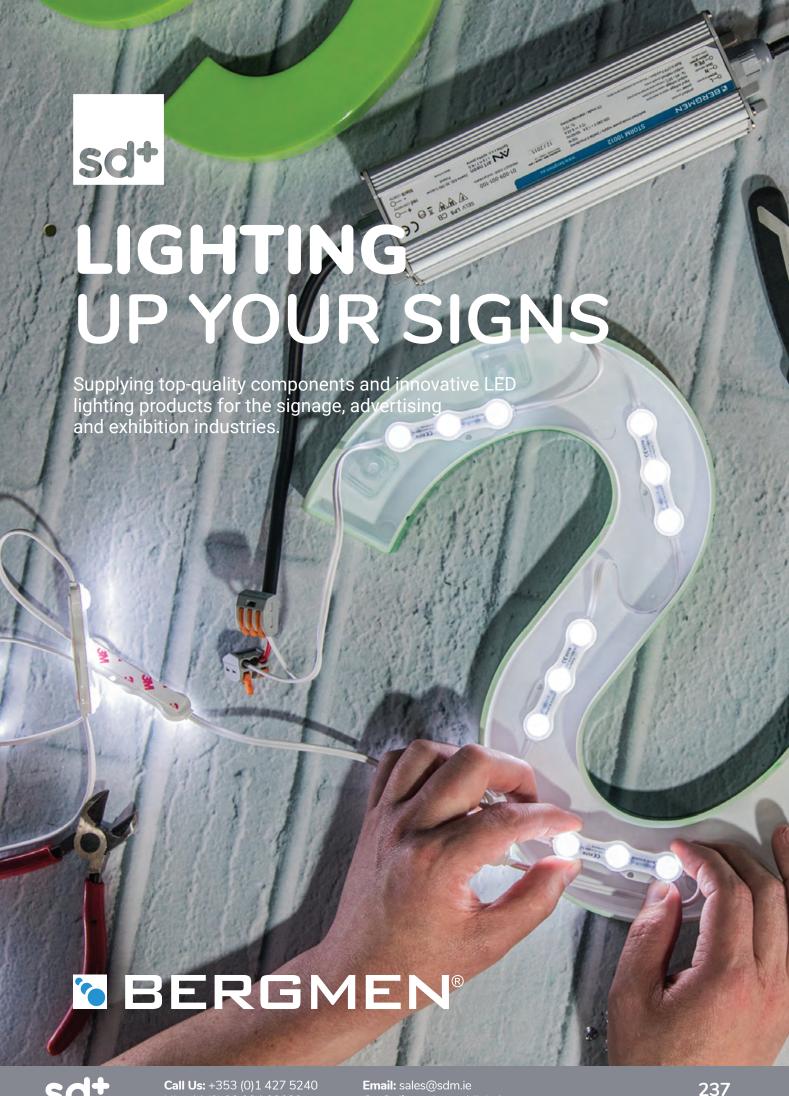

EASILY INSTALLED AND AMPLIFIES THE LED SIGNALS.

MODEL	VOLTAGE	POWER	OUTPUT CURRENT	DIMENSIONS	WEIGHT
Suple*	12V-24V	3 x 48W 12v 3 x 96W 24v	3 x 4A	95 x 52 x 30mm	0.210kg

LEDAMPLIFIER   * NON-STOCK. CONTACT US FOR AVAILABILITY.

LIGHTING UP YOUR SIGNS

Supplying top-quality components and innovative LED lighting products for the signage, advertising and exhibition industries.
