WHY YOU SHOULD CHOOSE SIGN + DIGITAL

Why is it that more and more of Irelands leading Sign and Digital companies choose Sign + Digital as their premier source for all their Sign Making and Large Format printing materials and supplies? The answer is simple.

It's because we know and love our materials inside-out! WE REALLY DO! We know their strengths and their limitations, plus we have hands on experience of working with our materials and equipment on just about every Sign and Digital printing job imaginable.

BUT FOR YOU IT'S EVEN BETTER THAN THIS...

because we here at Sign + Digital are so inspired by all of the opportunities with these materials that we genuinely enjoy sharing with and inspiring our valued customers. Tell us exactly what you want your materials to achieve for you and we will very quickly pinpoint the best possible materials to meet your requirements. All at the best possible price.

€ for € we offer you unbeatable value for money. With Sign + Digital you are always guaranteed top quality materials and equipment, all at exceptional value. It's the reason why more and more of Ireland's leading Sign and Digital companies are now looking to us for all their Sign and Digital Material requirements.

AND WE DON'T STOP THERE!

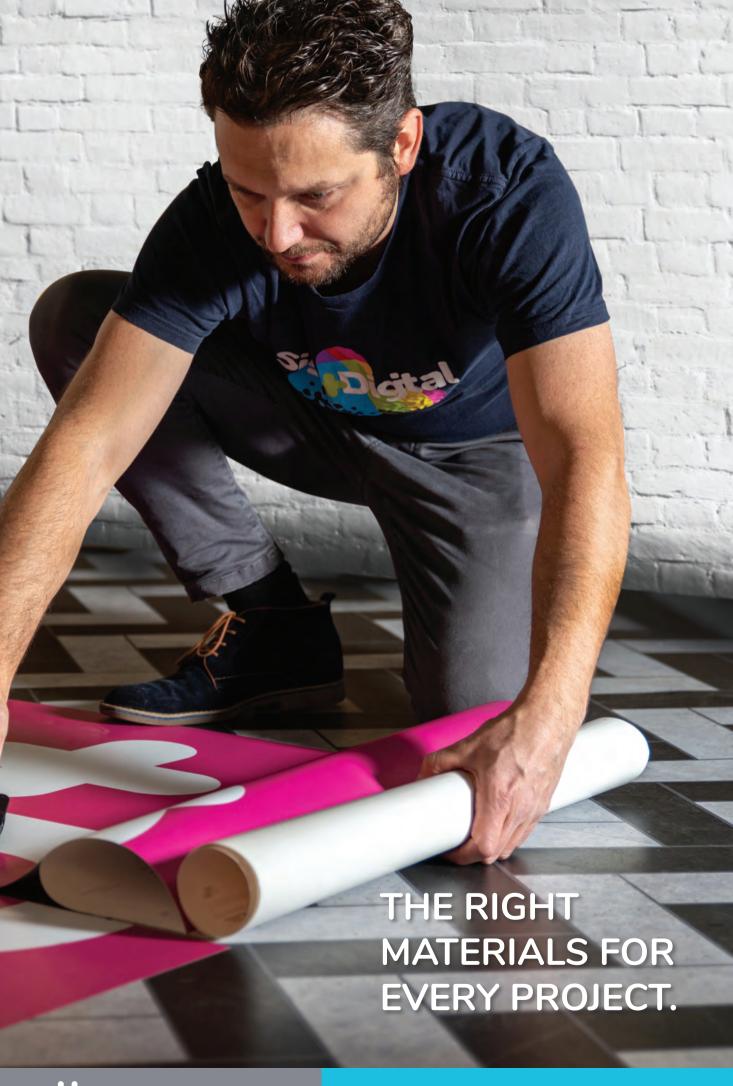

If you'd like INSPIRATION or hands-on experience of the materials or equipment before you buy, we'll be delighted to facilitate you. If you'd like one of our experts to help train you in at the initial stages, that's no problem at all. If you'd like to be able to pick up the phone and call us with your technical questions, that's fine with us.

Quite simply, we want you to be inspired, and we love sharing our knowledge. We don't think that there is a company in Ireland that looks after its customers better than we do - and that's because we genuinely value your custom.

HIGH TACK APPLICATIONS

IDEAL FOR 'HARD TO STICK TO' LOW ENERGY PLASTIC SURFACES.

201-HTAP is a premium white matt flexible calendared PVC film coated with HTAP permanent acrylic pressure sensitive adhesive. It's the perfect choice for 'HARD TO STICK TO', low energy plastic surfaces like polyethylene and polypropylene with a smooth or slightly textured flat surface, such as Kayaks, Quad Bikes, Wheelie Bins, Oil Tanks and Moto Cross Bikes. As the film is polymeric you will get little or no shrinkage giving you reliable long lasting solutions.

EXTREME HIGH TACK APPLICATIONS

VINYL

235 MotoMark™ 100 Micron 'GRIP' is a specially formulated premium flexible matt white PVC film with a unique 'High Bond' acrylic pressure sensitive adhesive. It is designed for applications where a flexible premium film with special high bond adhesion is required. The adhesive is formulated for the powersport graphic and decal markets. 235 MotoMark™ can be printed using a variety of solvent-based, latex, UV and thermal printers. This product may also be printed on using other printing processes such as UV screen and UV curable offset but must be tested before production.

235 MotoMark Grip Vinyl is perfect for low energy plastics, powder coated surfaces, aluminium and steel. Recommended for applications such as Quads, Motocross, PowerSport Vehicles, Helmets and Karts. Testing is always suggested before application.

General WallMark 226

General Formulations 226 is a 150 MICRON premium white matt semi-rigid calendared vinyl film with a specially formulated microsphere acrylic removable pressure sensitive adhesive backed by a layflat liner. The combination of vinyl and adhesive allows for easy removability of this product from normal wall surfaces. 226 is designed for permanent application of decals and graphics to most types of painted interior walls and windows. This includes most flat, semi-gloss and gloss paint finishes. Decals may also be applied to sealed wall coverings. The surface must be smooth and clean prior to application.

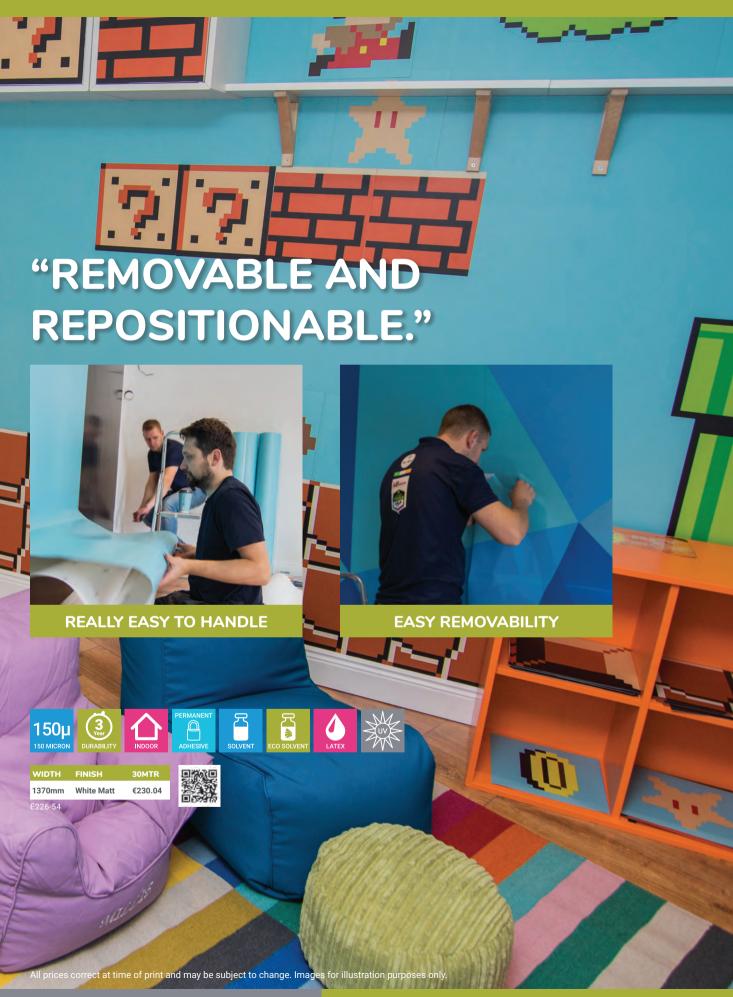

WHY SIGN MAKERS LOVE THIS PRODUCT

- 150 Micron semi-rigid matt vinyl makes it really easy to handle.
- · It's removable and repositionable.
- Special microsphere adhesive offers clean release from most painted walls.

CHALLENGE.

I'M WRAPPING A ROUGH WALL WITH DEEP CHANNELS THAT DOESN'T REQUIRE A LAMINATE. IT NEEDS TO BE REALLY EASY TO HANDLE FOR QUICK INSTALLATION.

SOLUTION...

ASLANCO DFP 45 WrapTheHouse

SELF-ADHESIVE DIGITAL PRINT FILM FOR ROUGH INTERIOR AND EXTERIOR WALLS.

The digital printing film for outdoor walls turns every facade into an effective advertising space. A special adhesive system ensures that WrapTheHouse ASLAN DFP 45 can be applied on every rough wall. CLEAN REMOVABILITY within an application time of 6 MONTHS.

If applied with heat to the entire surface, the product has an outdoor durability of up to 3 YEARS UNLAMINATED, and 5 YEARS LAMINATED with polymeric laminate and can be removed easily in one piece without leaving residues.

WHY SIGN MAKERS LOVE THIS PRODUCT

- Does not need to be completely applied with heat gun.
- 6 Month clean removability in one piece without tearing. After this duration, almost clean removability.
- Can be corrected and repositioned at the facade.
- Water-resistant special adhesive for fast and good adhesion.
- · Goes into deep corrugations.

2

SAVE LABOUR COSTS

- No lamination (saving also on material costs).
- Easy handling = fast application.
- Easy removability.
- Not tearing when removing = much guicker removal time.

"NO NEED FOR LAMINATION."

SOLUTION.

Sihl WallGraFX Prime 240FR

WANT TO LOWER YOUR INSTALLATION TIMES AND COSTS?

WallGraFX Prime is a dimensionally stable, self-adhesive polyester fabric with a satin coating for printing using solvent, latex and UV inks. It is excellent for the decoration of walls, exhibition stand walls, furniture and for advertising applications. The material can be easily applied to smooth and lightly structured substrates, can be repositioned and is removable without leaving residues. Perfect print quality, and the vaguely satin surface finish lends this product its own unmistakeable character. Its black backing perfectly covers highly contrasting substrates and M1 certification permits its use in public spaces and at exhibitions and fairs. The material is resistant to temperature and humidity fluctuations and is suitable for long-term use indoors and short-term outdoor use.

WHY SIGN MAKERS LOVE THIS PRODUCT

- Quick and easy to install saving time and money.
- · Brilliant colour reproduction.
- · Easily removed.
- Can be repositioned several times.
- Splash-proof prints ideal for short-term outdoor applications.
- · High opacity (>99%)/black adhesive backing.

SELF-ADHESIVE TEXTILES FOR WALL GRAPHICS

Call Us: +353 (0)1 427 5240 **NI:** +44 (0) 28 934 38683

In today's world of personalisation, digitally printed interior décor is transforming the spaces we live, work and play in.

If you've been experiencing any of the following in your business, then we'd like to help you.

- · Difficulty in finding new customers.
- Increased levels of competition that's driving your pricing down.
- Lack of inspiration and new ideas to get more business and more profitable revenue.

Sign + Digital have all the tools to help you grow your Wall Graphics business and to easily bring in more customers and more profitable revenue.

Half-Day Interactive Workshop designed to:

- Show you the latest trends that are happening in the world of large format wall graphics.
- · Demonstrate where the demands are from customers.
- · Show how you can easily market to these customers.

The opportunity in wall graphics is **BIG** and it's all around you. Todays commercial and residential spaces are full of exciting design and customised interior wall decoration and the demand is growing rapidly.

At Sign + Digital we have developed an amazing training workshop which will be highly motivating, inspiring, and designed to assist you to 'GROW your BUSINESS' and to make more money throughout the year and beyond.

During this Interactive Workshop you will:

- Learn all you need to know about printed wall graphics.
- · Discover the amazing things that can be done easily to change environments, not just walls!
- · Learn how to get great design and think outside the box.
- · Learn how to find new growing trends.
- · Understand how to differentiate yourself from the competition and stop selling cheap vinyl.
- · Understand the different materials that are used in interior decoration.
- · Learn how to market your business in a multitude of ways.

At Sign + Digital we are excited about the huge opportunity in Wall Graphics and Digital Printing, and we want to help you and your business become more successful in this area.

We're the experts when it comes to large format print, and are the leaders in providing you with the technical knowledge and fast customer support you need.

We don't only sell vinyl and display products. We have a passion to develop the tools that you need to grow your business easily and to support you to get more business.

At Sign + Digital we believe that by focusing on and supporting our customers to grow their business, we are also impacting on their staff and the wider community.

We want you to tap into this new fast growing market and we're here to support you all the way.

We promise to make it fun and inspiring!

- At the end of the Workshop you will be able to:
 Grow your business, even with your existing customers.
- Market your business in a targeted way that
- Have access to specially designed sales tools needed to grow your sales FAST
- WOW your customers and walk away with the order.

And you'll be bursting with ideas and confidence!

To secure your place or check on upcoming dates for this inspiring Workshop, talk to your local Rep or log onto: signanddigital.com/wallgraphics-workshop.

SELF-ADHESIVE TEXTILES FOR WALL GRAPHICS

JM reconsect Toutiles MEDIATEX WALL COVER EFFECT

A HIGH QUALITY TEXTILE WALL COVERING WITH PEARL EFFECT.

Mediatex Wall Cover Effect is a high-quality textile wallpaper characterised by a special 'mother-of-pearl' coating and is particularly well-suited for advertising in the beauty, jewellery and fashion sectors or in bars, cafés or retail outlets. It is extremely stable and easy to handle.

TEXTILEWALLCOVEREFECT

Textile 1000mm €363.60

JM rechnical Testiles. MEDIATEX MAGIC COVER

A HIGH QUALITY PHOTO WALL TEXTILE VINYL WITH GREY BACK.

Mediatex Magic Cover is a high quality print wall textile covering which boasts an opaque coating and grey back that completely covers dark spots and discolorations on a wall. The material is thick, so even the minor imperfections of a wall are no longer visable. Easy to handle, print and cut. Ideal for trade show graphics, POS and wall graphics.

SELF-ADHESIVE TEXTILES FOR WALL GRAPHICS

JM reconces Totalliss MEDIATEX SELF-ADHESIVE FR

A WHITE MATT SELF-ADHESIVE TEXTILE FOR HIGH PRECISION CUTTING.

Mediatex Self-Adhesive FR is a 100% polyester fabric ideal for wall decoration. Digital prints have a woven look that is particularly appealing for use in interiors for hotels, shops, conference rooms, reception areas and many more. The product is classified B1 FLAME retardant, is easy to apply and easy to remove.

JM RECORDER TRANSPORTER FR

A TEXTILE FABRIC STRUCTURE WITH GREY REVERSE.

Ideal for use as an indoor wall covering or roll-up, Mediatex Covertex FR is a sophisticated wall covering due to the textile fabric structure of its front side, and is an ideal solution for a high-quality roll-up material. PVC free and flame retardant, it also boasts a grey reverse, to hide wall imperfections and minimises light transmission to no more than 1%, preventing disruptive light shining through from behind.

All prices correct at time of print and may be subject to change. Images for illustration purposes only.

DRY WIPE WALLS AND BOARDS

ASLAN© CB 90

CLEARBOARD GLOSS FILM.

This self-adhesive clear whiteboard film is a highly transparent laminating film and turns every surface into a writable whiteboard. It is extremely scratch resistant and perfectly suitable for the production of whiteboards as writings can be wiped off easily without leaving any ghosting.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Best whiteboard quality on the market.
- · Very high degree of gloss.
- · Can be written on with all types of whiteboard markers.
- · Writings with whiteboard markers can be wiped off dry without leaving any ghostings.
- · Can be applied on every vinyl print.
- · High dimension stability.
- Permanent markers can be removed with an organic solvent, without damaging the surface.
- · Highly scratch resistant.

ASI ANCRONG

ASLAN CB 75

CLEARBOARD MATT FILM.

This self-adhesive film is a transparent matt laminating film. It is extremely scratch-resistant and perfectly suitable for the production of whiteboards as writings can be wiped off easily without leaving any ghosting. In combination with printed films, individually designed whiteboards can be created. The non-reflective, matt surface of the film is perfectly designed for front projections.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Low reflection, matt surface.
- · Can be used as a projection film by application on a white surface.
- · No shadows or ghostings after wiping off any writing.
- Flexible film for slightly curved surfaces.
- · Permanent markers can be easily removed with alcohol without damaging the surface.
- · Can be applied on every vinyl print.

DRY WIPE WALLS AND BOARDS

ASLANCE FERROSOFT FF 410

ESPECIALLY FLEXIBLE, MAGNETICALLY-RECEPTIVE FERROUS FILM

This ferrous film transforms any smooth, rigid surface into a magnetically-receptive board. It can be cut to any shape, is easy to apply and just as easy to remove - in one piece. It is perfect for combining with other self-adhesive films. ASLAN FerroSoft films are extra soft and flexible, so, depending on the surface, the laminated products can be shipped or stored rolled up.

TEXTILE WALL GRAPHIC VINYLS (3 MTR WIDE)

JN Technical Textiles MEDIATEX COVERTEX FR

COVER YOUR WALLS UP TO 3MTRS WIDE.

MEDIATEX® COVERTEX FR is suitable for use as a wall covering or roll-up and can be printed with latex, UV and solvent inks. A sophisticated wall covering due to the textile fabric structure of its front side, while its grey reverse hides any colour differences or dirt on the wall behind. Available in widths of up to 310cm, it can be used to cover larger areas with no seam whatsoever. MEDIATEX® COVERTEX FR does not require any dispersion adhesive so can be adhered to the wall with normal wallpaper paste. An ideal solution for anyone looking for a high-quality roll-up material. It is PVC free and flame retardant. On top of all this, it also boasts an intelligent grey reverse, which minimises light transmission to no more than 1%, thus preventing disruptive light from shining through from behind.

WHY SIGN MAKERS LOVE THIS PRODUCT

- Suitable for use as a wall covering or roll-up.
- Textile fabric structure.
- · Adheres to the wall with normal wallpaper paste.
- · Intelligent grey reverse hides any colour differences.

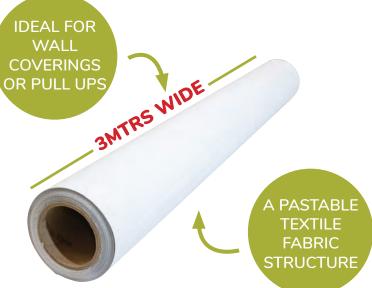

TEXTILECOVERTEXFR

PASTE THE WALL Technique. Avoid using dispersion adhesive.

BLACKBOARD FILMS

ASLAN© BB 910

HIGH-QUALITY BLACK BLACKBOARD FILM FOR CHALK AND LIQUID CHALK PENS

Premium Blackboard ASLAN BB 910, an especially highquality self-adhesive blackboard film, transforms any smooth, rigid surface into a blackboard for traditional or liquid chalk. It's extremely scratch-resistant, matt surface ensures residue-free chalk removal without leaving any shadows or ghosting. This makes it perfect for frequently changed messages in restaurants, POS, in training and seminar rooms, offices and homes. The selfadhesive film can be cut to any shape and size, as well as customised using UV-curing or screen printing inks.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Only blackboard film on the market from which liquid chalk can be removed without leaving residues.
- · Scratch and solvent resistant surface.
- · Writable with liquid chalk pens and school chalk.
- · Even after permanent use no ghostings will occur.
- · Writing with a permanent marker can be removed easily with organic solvents.
- · Easy to apply.

CREATE PROMOTIONAL GRAPHICS, MENU **BOARDS. POINT-OF-SALE GRAPHICS** AND MORF.

ASLANC

Print Etched DryApply DFL 300

This self-adhesive glass decoration film with a sleek etched glass look is perfect for long-term decoration of glass surfaces and for creating customised privacy screen solutions. Full-surface applications get the same high-class appearance as plotted designs and lettering as well as printed designs. It is perfectly suited for digital printing using solvent, eco-solvent, latex and UV-curing inks as well as screen printing.

The unique ASLAN DryApply technology guarantees an exceptionally clean, fast and easy dry application. Bubbles can be removed with ease thanks to very fine air release channels. In particular, large sections can be applied much more easily.

WHY SIGN MAKERS LOVE THIS PRODUCT

- Dryapply technology: very fine air release channels for exceptionally quick and easy dry application, without bubbles. Allows the film to be repositioned during application.
- Application tape can be removed immediately after application.
- Film is easy to remove, even after several years.
- · Suitable as plotter and printing film.
- Long outdoor durability of 7 years.

OPAQUE DIGITAL PRINTING VINYL

ASLAN OPP 25 BLOCKOUT FILM

DOUBLE-SIDED WHITE BLOCKOUT FILM FOR DIGITAL PRINTING

This high-opacity self-adhesive blockout film is white on both sides, making it ideal for double-sided advertising on glass. The high opacity of the blockout layer prevents the print motif from showing through. In combination with a reversely printed clear digital printing film such as Aslan DFP 41, both sides of a glass surface can be used without actually applying any film on the outside.

180ι

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Digital Printing film with white backing.
- · Opaque even when backlit.
- · Apply on one side only design both sides.

SILVER GLASS DECORATION FILMS.

The self-adhesive glass decoration films from Aslan feature etched, dusted and milky glass finishes and are perfect for short to medium-term decoration of transparent surfaces and for creating customised privacy screen solutions. The unique ASLAN Dryapply technology guarantees an exceptionally clean, fast and easy dry application. Thanks to very fine air release channels, large sections can be applied much more easily. Full-surface applications get the same high-class appearance as plotted designs and lettering.

WHY SIGN MAKERS LOVE THIS PRODUCT

- 80 micron thickness ensures easy application.
- · Film is easy to remove, even after several years.

ASLANC Illustra Range

GLASS DECORATION FILM WITH AN APPEALING DESIGN FOR EASY DRY APPLICATION.

These transparent films are printed with beautiful white patterns to give a simple yet effective stylish look offering scratch resistant privacy. Perfect for long-term decoration of transparent surfaces and for creating customised privacy screen solutions. They can be printed using solvent, eco-solvent, latex, UV-curing and screen printing inks. They also offer excellent plotting properties and very fine air release channels allow for bubble-free dry application making it clean, easy and fast to apply.

WHY SIGN MAKERS LOVE THIS PRODUCT

- A high-quality decoration solution for transparent indoor and outdoor surfaces.
- Ideal for privacy screens and room partitioning solutions whilst still allowing plenty of light to pass through.
- Short and long-term application on shop windows, glass doors, mirrors, partition walls and more.
- · Perfect for both private and public areas.

ASLANC Rear Projection RP 35

TRANSLUCENT WHITE REAR PROJECTION FILM FOR TRANSPARENT SURFACES.

The translucent white, self-adhesive RearProjection ASLAN RP 35 film provides the perfect medium for displaying videos, images and presentations with effective, eye-catching results. Applied on a transparent, rigid surface, it creates a projection screen that works with any standard projector or interactive presentation system. That makes it easy to integrate multimedia elements into design concepts for shop windows, POS displays or exhibitions. With the same ease and versatility, transform glass panels into large projection surfaces – in shops, offices, shopping centres or at trade fairs.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Superb rendition, in particular of light colours.
- Uniform, brilliant reproduction with no shadowing.
- · Excellent visibility, even in bright environments.
- · Suitable for use with all standard projectors and interactive presentation systems.

PRINTABLE RIGID FLOOR COVERING

CLEAR RIGID FLOORING

With Sign + Digital Clear Rigid Flooring, you are no longer creating floor graphics, but graphic floors. The product allows you to print directly to the reverse side of the product using UV ink, providing the ultimate in image protection and durability. Digitally printed graphics can also be mounted onto the Clear Rigid Flooring for stunning, durable floor graphics. Ideal for long term, bespoke vinyl flooring. Can be used for a wide range of applications across Restaurants, Hotel interiors, Architectural and Automotive applications, Dance and Theatre floors, Museum and Activity Centres. It comes in three different finishes, wood-grain, ceramic and coin. All finishes are suited for use in schools, nurseries, retail, trade shows, convention centres, sports arenas, changing rooms, bars/restaurants, cinemas and show rooms.

WHY SIGN MAKERS LOVE THIS PRODUCT

- No over laminate required.
- Rigid and Flexible.
- Easy to clean.
- Thickest wearing layer in the industry. Ideal for heavy footfall traffic.
- · Designed for 'Second Surface Reverse Mirror Image Printing' (UV only).
- · 100% recyclable and in guidance with anti-slip health and safety rules.

SOT CUSHION DISPLAY FLOORING

DESIGN YOUR OWN, INDIVIDUAL FLOOR.

This vinyl/PVC cushioned floor covering is the perfect, easy-to-install choice for medium-traffic, temporary display flooring for high-impact promotion, advertising, branding and wayfinding. At 50 micron thick, it can generally be used indoors or outdoors. Any small unevenness of the floor will be smoothed out, and in instances of noticeable bumps, simple subflooring can be used.

From exhibition stands and promotional events to retail showcases, fashion shows, theatre and stage installations, this PVC coated, polyester fabric-backed flooring media has been designed specifically for bespoke and customised digitally-printed graphics. As a cushioned vinyl, it is comfortable underfoot and has exceptional acoustic characteristics, and it also has dry nonslip and fire-resistant properties making it compliant for use in public spaces. It can be laid on any dry, hard and smooth surface including hardboard, wood, concrete and stage decking and it is just as easy to remove after use - leaving no residue behind.

HY SIGN MAKERS LOVE THIS PRODUCT

- · No lamination needed.
- · Cushioned vinyl floor covering which reduces ambient, localised noise.
- · Slip resistant and fire rated.
- · Easy to install and easy to remove.

ASLANO PrintMetal CA 30

PRINTABLE METAL EFFECT FILM WITH EXTRA LONG DURABILITY

This self-adhesive metal effect film with 5 years outdoor durability is suitable for the cutting plotter and is printable with solvent, eco-solvent, latex and UV-curable inks. Due to the SAME **COLOR EFFECT ON BOTH SIDES**, the PrintMetal ASLAN CA 30 is also perfect for use on transparent surfaces. The different metallic effects allow for a creative and effective design of all smooth surfaces. Available in Mirror Gold, Brushed Gold, Mirror Silver and Brushed Silver. Polished Silver and Brushed Copper are non stock items and available on request.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Ideal for printing with all standard solvent, eco-solvent, latex and UV-curable inks.
- · High scratch resistance.
- · Great colour selection.
- THE SAME COLOUR EFFECT ON BOTH SIDES, ideal for the design of glass, for example with mirrored fonts and logos to protect against vandalism and environmental effects.
- Easy to glue thanks to material thickness of 140 µm.
- Long outdoor life of 5 years.

Tape DURABLE METALLISED 3 YEAR OUTDOOR FILMS.

CREATE VISUAL EXCITEMENT FOR YOUR CUSTOMERS.

Metallised special effect films have always been popular for decorating race cars, billboards, and promotional signage. The distinctive look of these eye-catching films add value to their designs. The VinylEFX® Outdoor Durable Series, which provides up to three years of outdoor life, is comprised of a variety of cost-effective simulated metal, light-diffracting and 3-D patterns, designed for long-term outdoor signage. For demanding applications such as truck and boat graphics, the VinylEFX® Durable Series of films provide a superior alternative to the expensive simulated gold-leaf films.

SUPERIOR MAGNETIC SHEET

SELF-ADHESIVE FLEXIBLE MAGNETIC SHEETING.

SupaMag sheeting can be bonded to a wide variety of surfaces and medias, allowing for the creation of a magnetic surface for promotional material. If bonded to a surface or media substrate, the magnetic face can be used to create rapidly changeable, layered retail graphics in conjunction with Digifilm®, and graphical or information displays when used with SupaFerro® ferro sheeting.

Alternatively, to create magnetically receptive promotional material, printed media can be bonded to the adhesive face.

MAGNETICSA

PRINTABLE FERROUS FILM

THE PREFERRED CHOICE FOR INTERCHANGEABLE RETAIL GRAPHICS.

Digifilm is a universally printable, wide format flexible ferrous media, designed for creating vivid retail graphic displays. Ideal for use throughout a shop or showroom environment where it can be installed and updated quickly and easily without the need for specialist installation teams. Thanks to its light and flexible nature Digifilm® is suitable for large format displays on flat or curved surfaces making it a versatile choice for retailers and printers alike. As Digifilm® is a ferrous media held in place by magnetic attraction, additional layers can be applied over one another as and when required, allowing promotional messages or additional images to be added and removed in seconds by in-shop staff.

ANTI-SCRATCH MIRROR FILM

ASLAN MIRROREFFECT ANTI-SCRATCH SE 75

BRILLIANT, EXTREMELY SCRATCH-RESISTANT MIRROR EFFECT FILM AVAILABLE IN SILVER AND GOLD.

This high-quality self-adhesive film offers a striking, extremely high-gloss mirror effect. Applied to a flat surface, the film acts like a mirror, providing crystal clear reflections and making rooms appear bigger and brighter. The film surface is highly scratch-resistant, making sure the brilliant mirror effect is retained in the long term. A special feature of this polyester film is that the mirror effect is identical on both sides, providing stunning double-sided reflections on transparent surfaces.

Create plotted designs, logos and lettering or full-surface designs on smooth, flat surfaces. Stylish decorations with dramatic mirror effects in shop fitting, exhibition stand construction, visual merchandising, interior design and many other applications.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Brilliant, high-gloss mirror effect.
- Especially scratch-resistant surface: can be applied over entire surfaces without additional protection (transfer tape).
- · Mirror effect is retained in the long term.
- Easy to clean using conventional cleaning agents.
- · Identical effects on both sides.
- · Excellent plotting properties.
- Polyester release liner for optimum flatness.

FOR CHALK AND LIQUID CHALK

ASLANCE BB 910

HIGH-QUALITY BLACKBOARD FILM FOR CHALK AND LIQUID CHALK PENS.

Premium Blackboard ASLAN BB 910 is an especially highquality self-adhesive blackboard film, that transforms any smooth, rigid surface into a blackboard for traditional or liquid chalk. Its extremely scratch-resistant matt surface ensures residue-free chalk removal without leaving any shadows or ghosting. This makes it perfect for frequently changed messages in restaurants, POS, in training and seminar rooms, offices and homes. The self-adhesive film can be cut to any shape and size, as well as customised using UV-curing or screen printing inks.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · The only blackboard film on the market that allows residue-free fluid chalk removal.
- · Suitable for fluid chalk pens and chalk.
- · Scratch and solvent resistant surface.
- · Very easy to apply.
- · Permanent marker can be removed easily using alcoholbased cleaning products.
- Film can be cut to any shape.
- · Neutral white back for applications on glass that are visible on both sides.

FOR CHALK

ASLAN© C.61

BLACKBOARD FILM FOR CHALK.

This self-adhesive blackboard film transforms a wide variety of rigid and smooth surfaces into a classic black chalkboard in an instant. You can write on it with chalk as often as you like without leaving any shadows or ghosting. In places like offices, nurseries, schools and restaurants, you can turn walls, furniture or doors into versatile blackboards for frequently changed messages. The selfadhesive film can be cut to any shape and size, as well as customised using UV-curing or screen printing inks.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Looks like a real blackboard.
- Chalk can be removed easily with a damp cloth.
- Allows for very fine writing.
- Film can be cut to any shape.

ORAJET[®] 3551

Orajet 3551 is a 70 micron, 7 year solvent based digital vinyl that features a brilliant gloss-white surface that produces vivid, colourful prints. It features Orafol's ground-breaking COMMANDFORM technology. Sign makers love COMMANDFORM because it gives them a grey solvent based repositionable adhesive which is also removable up to 4 years without leaving any adhesive residue behind. That's why 3551 is the number 1 choice for simple to medium complexity vehicle wraps, long-term signage and wall graphic applications.

Available in white and transparent with a glossy or matt surface.

ALSO AVAILABLE WITH *Rapid*Air - an adhesive designed to help with speedy application while maintaining excellent tack to ensure a perfect bond.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · COMMANDFORM repositionable adhesive.
- Removable without residue up to 4 years 7 years unprinted.
- Great for simple to medium complexity wraps.
- High quality prints.

CARAVAN FILM PREMIUM CAST WITH *Rapid*Air.

Orajet 961RA is a high performance cast PVC film with excellent adhesion properties on difficult substrates. Available in white, black, silver grey and yellow, with a glossy surface. The RapidAir® technology enables easy and quick application, without air inclusion, especially in large scale applications. Entrapped air can be easily removed by smoothing it out under the film. Ideal for special decorations on challenging surfaces (uneven, porous, or textured, e.g. hammer finish varnish). Especially recommended for applications on low energy plastics (polyethylene, polypropylene), that require high long-term resistance. Suitable for thermal transfer printing (with resin ribbons).

WHY SIGN MAKERS LOVE THIS PRODUCT

- · RapidAir® technology.
- Ideal for special decorations on challenging surfaces and applications on low energy plastics.
- Suitable for thermal transfer printing.

ORACAL® 970RA

BEST HIGH CLASS FINISH ON THE MARKET.

ORACAL® 970RA Premium Cast Wrapping Film is a multi-layered, high performance, cast PVC engineered to the highest technological standards. Available in 96 colours with a high gloss or matt finish, it has been especially developed for complete car wrapping. The RapidAir® technology enables easy and quick application without air inclusion, especially in large scale applications. Entrapped air can be easily removed by smoothing it out under the film.

It is also suitable for uneven and slightly curved surfaces. The product should be worked in, cut and applied with an overlap at the edge for more curved surfaces, or for corrugations and rivets.

The applied material is easy to remove with the appropriate equipment.

WHY SIGN MAKERS LOVE THIS PRODUCT

- RapidAir® Application.
- 96 Colours available.
- · Excellent dimensional stability and gloss retention.

ORACAL®

975 PREMIUM CARBON FIBRE

Oracal® Series 975 Structured multi-layered 150 micron Cast Film has a textured surface specially developed for exterior automotive accent restyling and interior applications for fine detailing. Available in a range of finishes including carbon, brushed, honeycomb and more, this film offers an easy, fast and reliable way for professional re-stylers and sign shops to customise standard vehicles with high tech effects. Series 975 is also recommended for many interior design, craft and hobby applications. Series 975 Cast Film offers exceptional dimensional stability and conformability over uneven, arched or curved surfaces as well as flat applications. Featuring a transparent, solvent-based, repositionable adhesive and PE-coated silicone liner.

Best suited for covering parts of the car, (eg the roof, bonnet, and other such parts) that need tuning. Not for complete wraps.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · 5 Year outdoor durability.
- · Solvent repositionable permanent adhesive.
- · Outstanding dimensional stability.
- · Optimum application characteristics for wrapping.

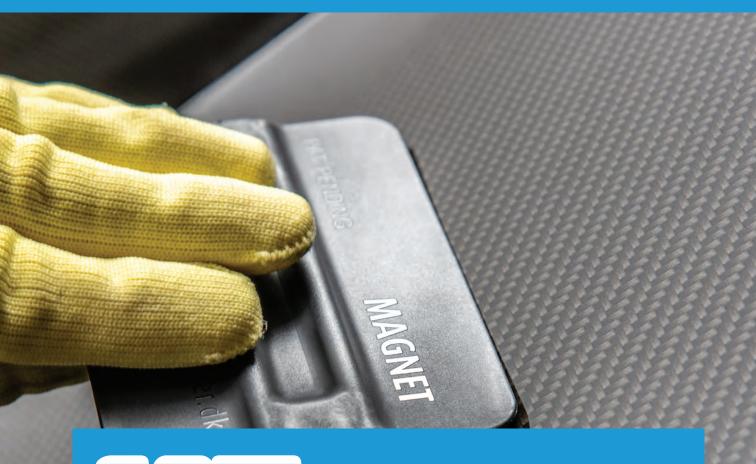

All prices correct at time of print and may be subject to change. Images for illustration purposes only.

CARBON FIBRE VINYL

Elemento-6 (1917)

THE CARBON FIBRE EVERY WRAPPER WANTS.

A high gloss 3D malleable 150 MICRON cast film with a woven carbon fibre pattern between the two PVC layers. The high gloss transparent coating creates a marvellous sense of depth when the film is bent. The pattern remains nicely intact when installed on convex and concave surfaces.

SOTT Elemento- $6^{\text{\tiny M}}$ is extremely conformable and ideal for automotive as well as industrial and marine applications.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · High gloss with a smooth finish.
- · 3D pliable.
- · Repositionable solvent adhesive.
- Microscopic air channels in its adhesive layer.

Sihl 3687 TRISOLV BILLBOARD BLUEBACK POSTART PAPER SATIN 130GSM

3687 TriSolv™ Paper Blueback is an economical weight, bright white, wet strength paper that features outdoor durability, excellent scratch resistance, and blueback to block show-through of mounting surfaces or materials. The entire TriSolv™ family of products is compatible with solvent, UVC and Latex printers.

Sihl 3683 TRISOLV POSTER PAPER PRIME 135 BB SA GLOSSY

A BLUEBACKED, SELF-ADHESIVE POSTER PAPER FOR POSTERS AND ADVERTISING APPLICATIONS.

This multi-coated, weather and water-proof paper with a gloss finish is suitable for the production of indoor and outdoor advertising boards or exhibition stand walls. The product features a permanent acrylic adhesive backing and adheres to almost all clean and smooth surfaces. The opacity of the blueback ensures very good coverage of substrates. Features high scratch resistance and can be used without additional lamination for indoor advertising applications. Recommended for short to mediumterm outdoor applications.

SinL 3689 TRISOLV™ WET STRENGTH POSTER PAPER PLUS SATIN 130GSM

3689 Trisolv Poster Paper is a universal poster and billboard paper for outdoor and indoor applications. This multi-coated, weatherproof paper features high wet-strength and a satin finish. Qualifies for outdoor billboard applications and displays with good resistance to scratches and very good folding endurance.

1372mm €76.86 PAPER3689

Sihl 3686 TRISOLV™ POSTER PAPER PRIME GLOSS 200GSM

3686 TriSolv Paper is a premium weight, bright white, wet strength paper that features outdoor durability and excellent scratch resistance. The photorealistic prints impress with high colour brilliance and very good image definition. The material dries quickly even with high ink densities and displays good flatness.

PAPERTRISOLV200GSM / PAPER3686G

Sihl 3685 TRISOLV™ POSTER PAPER PRIME 135 SA GLOSSY

SELF-ADHESIVE POSTER PAPER FOR ADVERTISING APPLICATIONS, STICKERS AND LABELS.

This multi-coated, weather and water-proof paper with a gloss finish is suitable for printing with solvent, latex and UV-curing inks. Its waterbased permanent acrylic adhesive adheres to virtually all clean, smooth surfaces and makes it possible to produce custom-designed stickers and labels. Thanks to its water-repellent surface, TriSolv Poster Paper Prime 135 SA can also be used for short to medium-term outdoor applications. The particularly robust liner makes this paper very good for use in printer/cutters.

Sihl 3268 QUICK DRYING PAPER SATIN 150GSM

Sihl 3268 is a standard matt satin coated poster paper that produces images of an excellent quality, outstanding colour vibrancy and provides a very fast drying time. It is a multipurpose paper and is suitable for indoor advertising and POS displays. The 150gsm 175 micron paper has a beautiful white matt finish and is extremely versatile. It has a water resistant surface and is FSC certified.

Sihl 3454 SOLVENT PHOTO PAPER PE 240

PREMIUM PE COATED PHOTO PAPER FOR POSTER AND PHOTO APPLICATIONS.

This PE coated, glossy photo paper is ideal for all high gloss advertising and photographic prints for indoor applications. Prints impress with high brilliance, a homogeneous gloss and quick drying times. The splashproof coating ensures a particularly durable and scratch resistant printed image. This high quality, stiff base paper also makes it possible to produce prints for longterm indoor use without lamination.

Sihl 3699 TRISOLV™ PHOTOART PAPER 210

PREMIUM, GLOSSY PHOTO PAPER FOR PHOTOREALISTIC PRINTS FOR INDOOR AND OUTDOOR USE.

This multi-coated, weatherproof and water-resistant paper with a glossy surface finish impresses with a look and feel similar to photos and is characterised by very high colour brilliance and image definition. The material dries quickly even when printed with extremely large ink densities. This water-repellent product can be stuck to a wide range of smooth substrates such as wood or metal with wallpaper paste or double-side adhesive tape as easily as papering a wall. Prints are long-lasting and offer high scratch resistance and durability even without additional lamination.

BACKLIT VINYLS

AUROLUX BACKLIT Sihl SOLVENT WF 150

GLOSSY BACKLIT FILM FOR LIGHTBOX ADVERTISING.

This glossy, coated polyester film with a light-diffusing back layer has been specially developed for printing with solvent, latex and UV inks and is suitable for use in both indoor and outdoor lightboxes. The particular strengths of this backlit film lie in its very pleasing gloss finish and impressive brilliance in both reflected and transmitted light, which make it ideal for use in daylight and at night. Its particularly high resistance to adverse conditions makes it suitable for application in damp locations or where humidity is high.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Outstanding brilliance in reflected or transmitted light.
- · High gloss.
- · Splashproof prints.
- · Good scratch resistance.
- High dimensional stability.

PRODUCE BRILLIANT BACKLIT SIGNAGE FOR BOTH INDOOR AND OUTDOOR USAGE.

Orajet 3850 is a 80 micron, 7 year translucent calendered PVC film. Available in white with a semi-gloss surface it is ideal for long-term use on rigid substrates in backlit indoor and outdoor applications.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · 7-year exposure.
- Ideal for backlit signage.
- · Can be used indoor and outdoor.

ORACAL® 651

EUROPE'S LEADING HIGH GLOSS INTERMEDIATE FILM.

Thanks to its proprietary formulation and construction, ORACAL series 651 has become the industry standard for high-performance calendered films. Only 70 micron thick, ORACAL 651 offers five-year outdoor durability, flexibility, thermal print compatibility, and a choice of 59 high-gloss colours. This high-quality film is a good choice for moderately complex jobs that don't require the extra conformability provided by our cast films. Oracal 651 is one of the most opaque films available and is loved by sign makers because of its high gloss finish.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Intermediate calendered vinyl 5 Year.
- · High quality special PVC.
- 5 year outdoor durability.
- · One of the most opaque films available.
- · High gloss finish.
- Easy to weed.

ORAMASK 810 is developed for use in stencil applications, especially for paint and spray techniques on complex curves, uneven or semi-flexible substrates and surfaces requiring transparency of the mask for substrate visibility. Applications include vehicle lettering, promotional lettering and signs in general. It is a highly flexible film which makes it perfect for designs on both even and uneven surfaces and it has excellent weed-stripping properties. The fact that it is translucently dyed ensures the surface underneath will remain visible. ORAMASK 810 has a water-based removable polyacrylate adhesive which won't leave residues after removal. Not suitable for wet application.

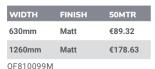

WHY SIGN MAKERS LOVE THIS PRODUCT

- Translucently grey dyed stencil film which ensures the surface underneath will remain visible.
- Matt finish.
- For all paint and spray techniques, also on uneven surfaces.
- Removable adhesive.

ASLANCE PAINTMASK S 79

STENCIL FILM FOR PAINTING AND LACOUERING WORK ON SMOOTH SURFACES.

This self-adhesive stencil film is perfect for painting and lacquering work on smooth surfaces. For sharply defined lettering on truck curtains, acrylic sheets or signs. With its high dimensional stability, this masking film makes for quick and easy work. It can be removed easily when the job is finished, without leaving any residue.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Especially quick and easy application saves time.
- Residue-free removal.
- · Grey, low-reflection surface for easy lettering.
- Perfect for overlapping and multi-layer painting on touch-dry paints.
- Solvent-resistant.

Chapter 8 are the set of governing regulations that help prevent road collisions on the motorways and road sides. Section 5 says it is mandatory for all working highway vehicles to have rear chevrons of retro-reflective material, plus if the vehicle is not of conspicuous colour, ie. yellow or white, it must have a fluorescent strip no smaller than 50mm high along the side of the vehicle.

WHAT GRADE OF REFLECTIVE IS REQUIRED?

If the vehicle is for traffic management purposes on high speed roads, a class RA2 to BS EN12899-1 reflective vinyl or microprismatic is required. All other vehicles working on highways must a have minimum of class RA1 reflective vinyl but RA2 or microprismatic reflective vinyl is recommended in all cases for greater conspicuity and safety.

IS THERE A SPECIFIC PATTERN TO THE CHEVRONS?

Yes, stripes are to be no less than 150mm width and must be inclined at 45-60 degrees pointing upward to the centre of the vehicle, alternating stripes of retro-reflective red and fluorescent yellow.

ARE THERE DIFFERENT SPECIFICATIONS FOR ESCORTING VEHICLES?

Yes. Stripes are to be no less than 250mm width on vans and larger vehicles and 150mm width on cars and car derived vans. Also the chevrons will continue in a unbroken pattern onto the sides of 300mm and shall be over the full height of the vehicle.

ORALITE® 5400

RETROREFLECTIVE FILM FOR VEHICLE GRAPHICS

Due to the flexibility of the 5400 series, this material is ideal for vehicle graphics. Oralite 5400 are weatherproof, self-adhesive retroreflective films with an excellent corrosion and solvent resistance. The retroreflective system consists of catadioptric glass beads which are embedded in a transparent layer of plastic material.

The ORALITE® Reflective films series were especially developed for the manufacture of guidance and information signs. Suitable for both digital printing with solvent based inks and for use on cutting plotters. The smooth surface shows a high scratch resistance and impact strength.

7

WHY SIGN MAKERS LOVE THIS PRODUCT

- Weatherproof.
- · Excellent corrosion and solvent resistance.
- · Ideal for guidance and information signs.

FOR SPECIAL HIGH IMPACT VISIBILITY.

With the longest outdoor durability rating in the industry (2 years*), this premium cast, high-gloss fluorescent film is ideal for graphics requiring special, high-impact visibility. ORACAL® 7510 is a cast film with excellent cutting, weeding, application, and conformability characteristics. Especially effective in twilight and poor visibility conditions, it's ideal for short-term vehicle and bus advertising, point-of-purchase displays, labels, decals, and other retail applications.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Premium cast, high-gloss fluorescent film.
- · High-impact visibility.
- · Effective in twilight and poor visibility conditions.

*1 year durability for orange fluorescent.

OPTION 2: CHEVRON VINYLS

HIGH PERFORMANCE LIVERY FILM.

ORALITE® VC612 Flexibright™ is a tough weather resistant product designed for rugged outdoor use for livery applications on emergency services vehicles. The material is die cuttable and plotter cuttable, and easy to apply onto smooth painted or unpainted vehicle surfaces. The material does not need edge sealing, and is designed to be especially applicator user friendly and flexible, with potentially single piece removability and the possibility to template to far fewer pieces than other prismatic livery films.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Conformable Prismatic Reflective Vinyl.
- · Easy application even onto curved surfaces.
- · High brightness.
- · High end Chapter 8 reflective.
- · 80% return of light excellent for Chevron Kits.
- Conformability to demands of larger vehicle shapes.
- No edge sealing required.
- Withstands power washes.

RALITE® 5400

DIGITALLY PRINTABLE REFLECTIVE VINYL.

ORALITE® 5400 Commercial Grade was especially developed for the manufacture of guidance and information signs as well as for reflective advertising art, which are intended for a short-term outdoor use and which require just a minimum of retroreflection. They are suitable both for digital printing with solvent based inks and for use on cutting plotters and provide good adaptability including to uneven surfaces. The smooth surface shows a high scratch resistance and impact strength, and a very good printability. The colours at daylight comply with the international specifications for reflective materials of this class.

ORALITE® 5400 Commercial Grade vinyls are weatherproof, self-adhesive retroreflective films with excellent corrosion and solvent resistance.

WHY SIGN MAKERS LOVE THIS PRODUCT

- Weatherproof.
- Excellent corrosion and solvent resistance.

WHERE SHOULD THE TAPES BE APPLIED?

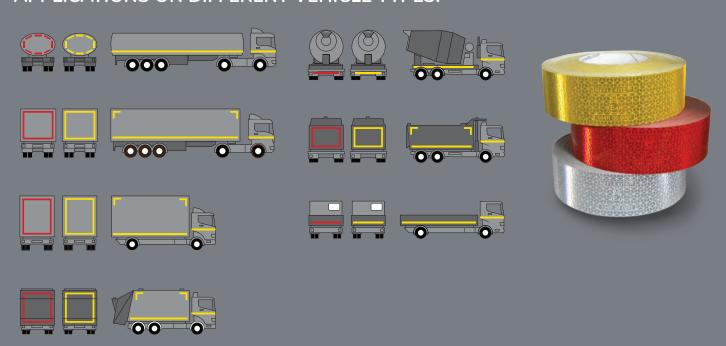

To the rear: Here a full contour marking is required, i.e. a full 'box'. **To the sides:** Here you can choose to do either a full contour ('box') marking, or a linemarking of the length of the vehicle plus marking of the upper corners if the design of the vehicle allows for this. Minimum 80% of the length of the vehicle (excl. the length of the cabin) must be marked. The lower line of the marking tape must be placed at a minimum of 25cm from the ground and at a maximum height of 150cm. This can, in special cases, be extended to 250cm.

The lenght of the upper corner markings must be a minimum of 25cm. Upper corner markings should be applied as high as practical, but within 40cm of the upper extremity of the vehicle. In cases where a top corner marking is not possible due to the construction of the vehicle, a line marking on its own is allowed.

It is a good idea to mark also the tractor (e.g. on the door) to visually get a marking of the full length of the vehicle, however this is not an obligation.

APPLICATIONS ON DIFFERENT VEHICLE TYPES:

ORALITE® VC104 + RIGID GRADE

THE IDEAL TAPE FOR RIGID VEHICLES SURFACES.

- · Approved to ECE 104 Class C.
- · Easy to handle and apply.
- · No need to edge seal.
- No risk of the tape cracking.
- Robust enough to withstand cleaning processes including power washing.
- 10 year warranty.

HAZARD TAPES

ORALITE® 5431IND

COMMERCIAL GRADE HAZARD WARNING TAPES.

ORALITE® 5431 Construction Grade films are weatherproof, self-adhesive retroreflective films with an excellent corrosion and solvent resistance. The retroreflective system of the ORALITE® 5431 Construction Grade consists of catadioptric glass beads which are embedded in a transparent layer of plastic material (classification RA1, design A, former Type I). The smooth surface has a high scratch resistance and a good printability. The minimum reflection data corresponds to EN 12899-1. The daylight colours correspond to the international norms for reflective materials of this class. If a lower degree of reflectivity is enough for your marking purposes, this Commercial Grade is the ideal solution.

WHY SIGN MAKERS LOVE THIS PRODUCT

- · Highly flexible reflective film.
- · Surface of cast PVC copolymer.
- · Weather proof.
- Compliant to DIN 4844.
- · Class RA2, design A.
- · Available in black/yellow and red/white.

ARCHITECTURAL DESIGN FILMS

Call Us: +353 (0)1 427 5240 **NI:** +44 (0) 28 934 38683

Architectural Design Films have been specially developed for the architectural display market and can be applied indoor on most flat or slightly curved surfaces.

SELF-ADHESIVE

Architectural Design Films have a high quality adhesive that allows application onto most surfaces including Plywood and MDF (preferably pre-coated), solid wood, plastic, metal and most lacquered surfaces.

TEXTURED

Architectural Design Films have beautiful textures that create visual impact as well as being realistic to the touch. Our wood ranges really do look as good as wood!

HIGH QUALITY

Architectural Design Films come between 200-400 micron thickness, depending on the film. This product offers exceptional resistance to water, dirt, abrasion, UV rays and wear (yellowing, cracking, scaling, delamination).

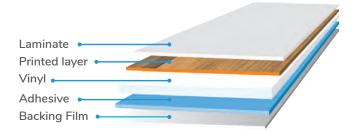

CONFORMABILITY

The film delivers excellent application characteristics with great conformability and can cope easily with irregular surfaces and moderate curves.

PVC FILM

Architectural Design Films are multi layered Polymeric PVC Films.

QUICK AND EASY

Architectural Design Films have a high quality air flow adhesive which allows for the removal of entrapped air during installation. This makes the films easy to handle and the installation process simple and quick.

CERTIFICATIONS

- · Rated A+ on VOC tests (indoor emissions).
- · UV and Fire resistant.

SAFETY

Architectural Design Films are a safe high quality interior film that can be used in any environment with excellent flame retardancy and stability.

STAIN RESISTANT

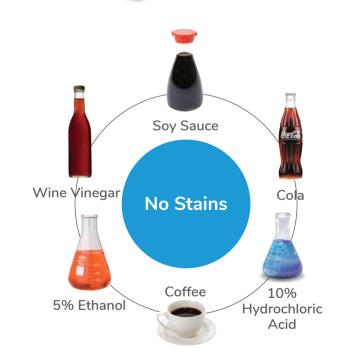

With its excellent surface finish Architectural Design Films stand up to the toughest tests. Its stain-resisting surface can withstand intense substances such as vinegar, soy sauce, cola, coffee, 5% ethanol and 10% hydrochloric acid. In tests, even after several hours exposure to such substances, the surfaces remained completely intact.

The films can be kept clean using all household cleaners. This allows for their use in hygienically sensitive areas, for example in bathrooms and kitchens.

HEALTH

The PVC film contains no harmful softeners (Phthalates) or heavy metals such as lead, cadmium, mercury or chromium.
