

A wise sign maker once said, you need

A KICK IN THE MICKEY

if you don't buy
one of these!

ROLLOVER

THE ART OF LAMINATING

Simply put, the Rollover Flatbed Applicator's functionality offers a **better way** of streamlining multiple tasks and solving the daily challenges faced by today's sign maker.

Regardless of media type, which can be up to 90mm in thickness, the Rollover will ensure a **perfect result** at a minimum of time.

Optimal ergonomic work positions have been the basis for the design of the Rollover Flatbed Applicator.

Being able to comfortably control the laminator **with one hand** whilst having free access to the roller, media and tabletop, results in smooth and effective operation. Perfectly flat application without bubbles or creases is obtained in a **minimum of time**, and waste is greatly reduced. Illuminated glass tabletop and special cutting mat improves accuracy and control during operation, and makes the Rollover

a **perfect workstation** to complete many of the other sign making production requirements.

Flexible extra media-holders and side trays facilitate numerous applications and the handling of oversized media.

The Rollover is extremely **user friendly** and with the aid of both the detailed manual and hands on instruction from our installation team, you could be using your Rollover Applicator within an hour of set up.

The time the Rollover has saved us has already helped us win new clients and business.

Steve Laing - Fresh Graphics.

THIS MACHINE WILL SAVE YOU TIME AND MONEY!

EASY ONE-HAND OPERATION

By using the ergonomically shaped and inward-facing handles, the roller can be moved easily over the tabletop both in a raised and lowered position.

ROUNDED HOUSINGS

No sharp edges and protected activation switch provide superb and unobstructed access to the work surface.

HANDY TOOL POCKET

Store your tools in these conveniently placed pockets on each housing.

SELF-HEALING CUTTING MAT

The transparent 5mm PVC (Phthalate-free) cutting mat improves accuracy when cutting and aids control during operation.

ILLUMINATED (LED) GLASS BED

The work surface can be back-lit to improve accuracy during operation (cutting etc.).

LARGE SIDE TRAYS

For storage and handling of oversized media across the table top.

CASTORS

To enable easy relocation and transport of the machine.

" We can now apply all our graphics and premask without bubbles or creases within seconds.

Andrew Mc Cabe - AMC Branding, Dublin.

ATTACHMENT POINTS

For brackets & spindles holding media and application tape. Also found at the roller housings.

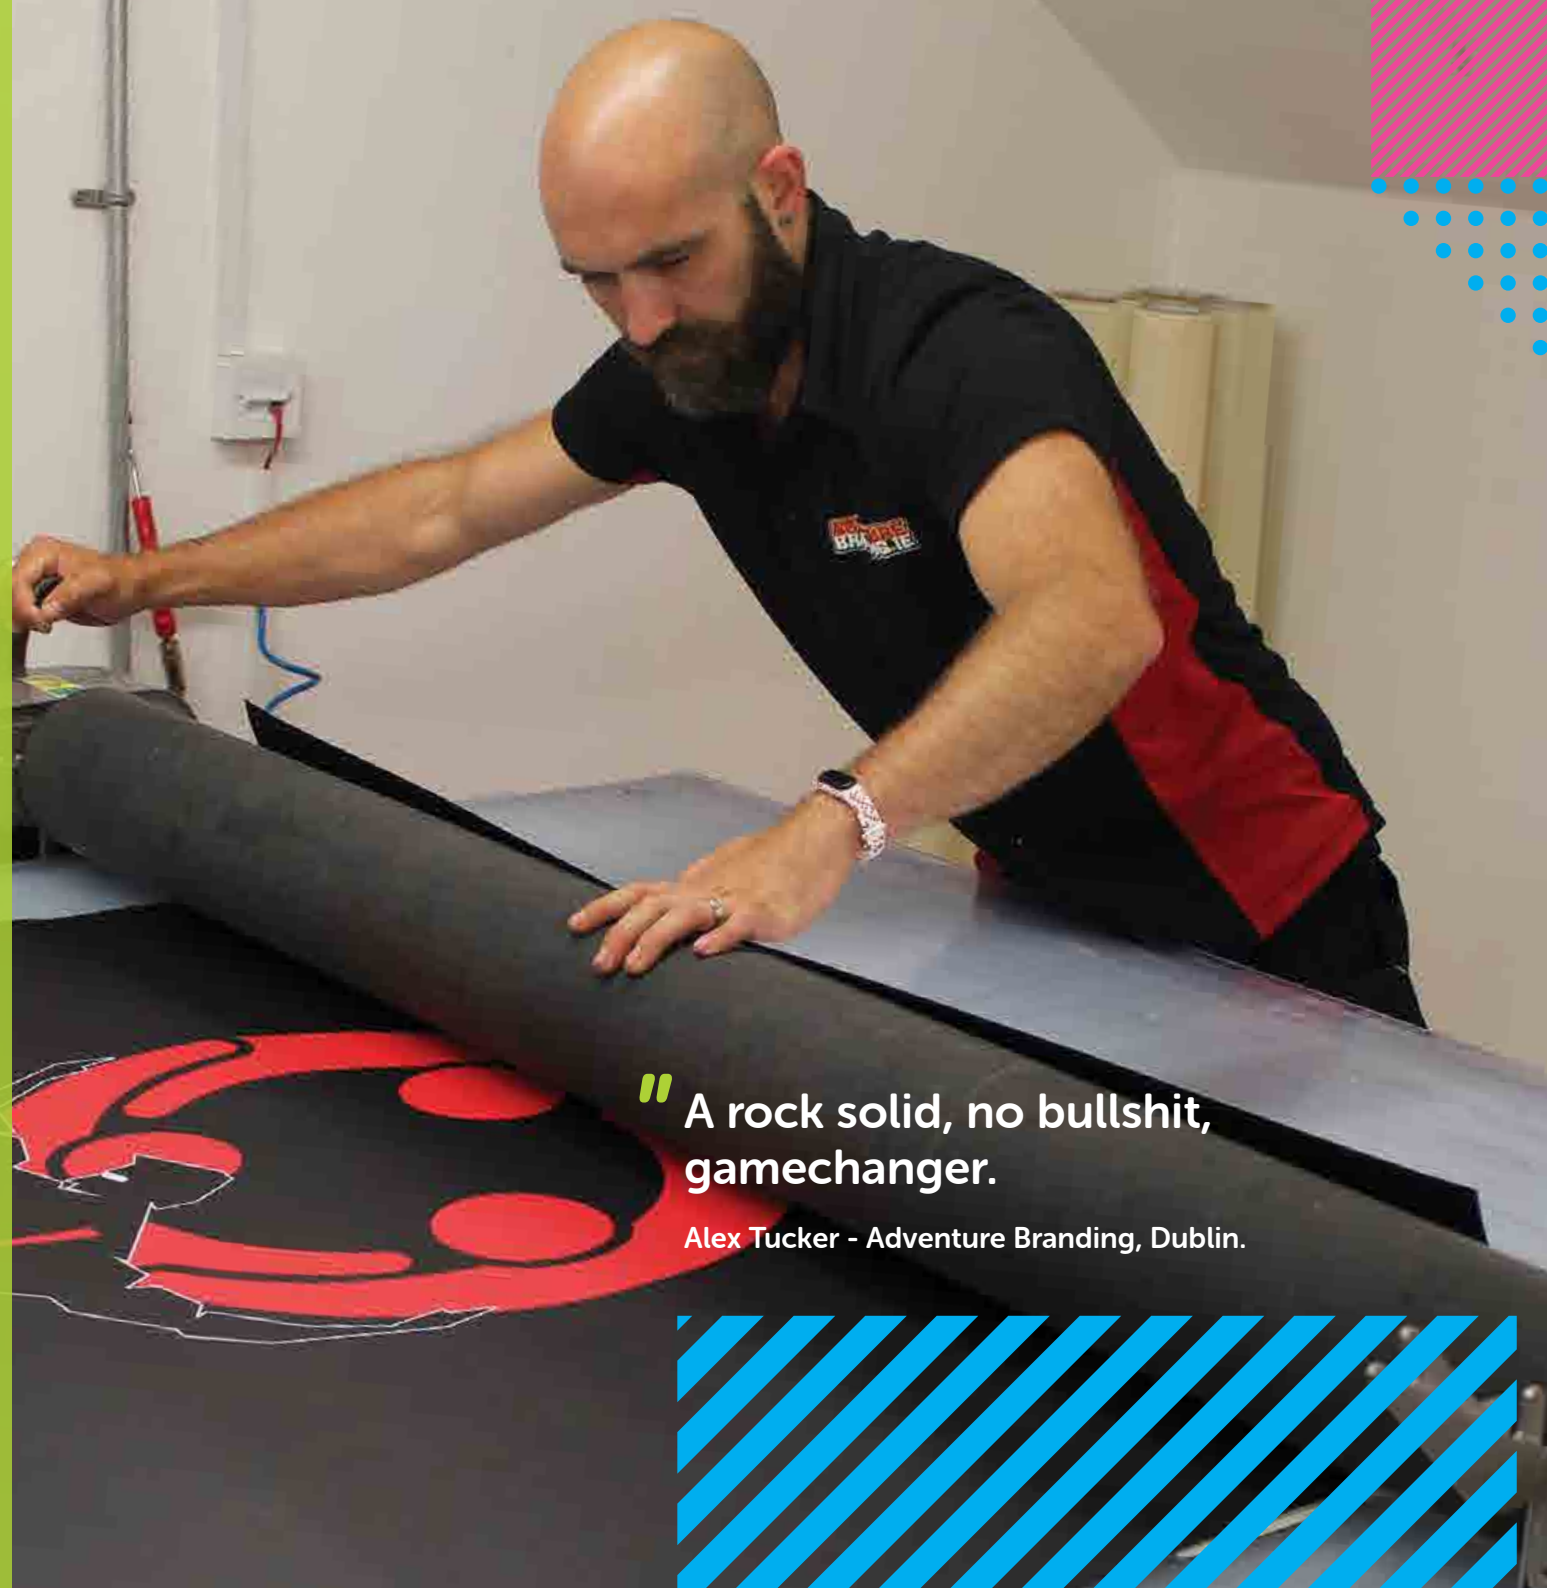

DESIGNED AND ENGINEERED
IN NORWAY

RIGID PANEL APPLICATION

Applying digital prints and other self-adhesive applications on rigid panels e.g. correx, foamex, dibond, aluminium etc., is just one of the areas where the Rollover excels in both result and operation. Substrates up to 90mm thick can be handled for perfectly flat applications without bubbles or creases.

The Rollover's flexible laminating capabilities mirror conventional laminating systems where digital prints may be coated with protective laminates. These jobs can be done quickly and without bubbles or creases.

" A rock solid, no bullshit, gamechanger.

Alex Tucker - Adventure Branding, Dublin.

THE ROLLOVER AS A WORK STATION

When cutting on the self-healing cutting matt or even working with flexible skins and hoardings, the Rollover's back-lit work area provides an excellent work station solution to help sign makers with their signage production challenges.

"The Rollover has streamlined our business. We should have bought one years ago, the time saving it has brought to our business is massive.

Patrick Dennehy - Pat Dennehy Signs, Cork.

APPLICATION/ TRANSFER TAPE

Executing frequently occurring tasks like the use of application tape, is easily transformed into a "one man or one woman task". By using the extra media holders, the full width of the tabletop can be utilised. Besides the perfect result, great savings in time and cost are obtained by using the Rollover Applicator.

"An investment I never thought I would make! Extremely glad we did. Great for lining up vinyl on boards for perfect straight cuts everytime.

David Lyons - Budget Print, Londonderry.

OPTIONAL FEATURES

The Rollover can facilitate a multitude of optional features including support for the KeenCut EV02 cutter. With easy attachment of a support shelf and using pre-drilled holes, any Rollover model can accommodate a KeenCut EVO2 cutter to cut substrates such as rigid boards and other media types.

"You cannot run a sign shop without a Rollover. Anyone thinking of buying one should just buy one! It's an incredible piece of kit.

Ray McCarthy - Extrabrite Signs, Dublin.

ROLLOVER

FLEXI

THE FLEXIBLE OPTION

Rollover Flexi is the new, flexible addition to the Rollover range. With all the essential qualities of the existing line of Flatbed Applicators, this unit also offers quick dismantling to facilitate entering premises with difficult access.

The Flexi model arrives fully assembled, but is constructed for convenient and quick dismantling in three main sections:

- The sliding arms/roller gantry.
- The glass bed and supporting frame.
- The leg section.

These elements can be individually transported into premises with difficult access. This is done either manually or by using the specially developed transport tool.

DIFFICULT ACCESS IS NO LONGER A PROBLEM!

OVER
50

SIGN MAKERS HAVE SPOKEN

Sign & Digital have successfully installed over 50 Rollovers. With competitor installations numbering only a handful in comparison, you will find that once you have experienced the Rollover capabilities, you will see why it's the right choice for increased productivity, time and money saving.

INSTALLS

WE DON'T JUST DROP AND GO!

Our installation team bring a great deal of experience and expertise, and offer a level of back-up support which, quite simply, is **second to none... anywhere!**

And we won't just drop your Rollover at your doorway and leave you. We are **committed** to providing excellent after sales service, and will teach you or your staff how to use your new Rollover - making you more productive and confident - saving you time and money.

Signs with Flair, Belfast.
